Xenon-White® Bulb

High Intensity Discharge (HID)

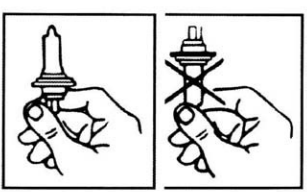
The Street Glow Xenon-White® bulb was designed and manufactured to provide a clean white light for maximum illumination at night as well as to serve as a daytime driving light. Utilizing Xenon-White® technology, each bulb works to greater efficiency and lasts longer than standard halogen bulbs.

• **Easy Installation-** The Xenon-White® bulb easily connects to your standard headlight bulb socket. Make sure the Xenon-White® bulb style # matches your current halogen bulb.

NOTE: If your replacing with a bulb of higher wattage, be sure to check the relay harness to see if it can handle the extra amperage.

CAUTION

- Remove bulb being replaced carefully. Do not handle or break bulb for it is under pressure and may burst causing injury
- Never handle the glass of the Xenon-White® bulb
- Oil, grease or other residue on glass may cause bulb to burst when turned ON. Thoroughly clean bulb with alcohol cleaner to remove any substance before turning bulb ON.



- Never power the Xenon-White® bulb unless it is fastened into the proper wire harness and affixed into lighting assembly.
